

## Comments from Our Graduates:

"The DoDAF FEAC Program is one of the best professional educational programs offered supporting the acquisition of information systems."

Shelton Lee, Certified Enterprise Architect (CEA)  
Chief Technology Officer, Xantia, Now at LMCO

"I would like to take the time to tell you that I really enjoyed the (DoDAF Certification) program. I am using my new found skills daily and that's something. I am now a Program Manager again and have architects that work for me. What's really important to me is that I can instruct them on the approach and have a confidence in my knowledge base that really helps...."

FA LMCO

"The fact that I've been certified through the FEAC course has made a difference to me and to my employer. You said that we're 'trailblazers', and we are indeed leading the way toward EA in the Federal arena. I'm finding that qualified and senior consultants (who are experienced with business processes, system architecture, and other component parts of EA) are hungry to learn how to fit the parts together and how to sell the program to the business managers. I really appreciate the work you and the other FEAC Institute members have put into making this a useful course."

Pat Taylor

"...The FEAC Institute provided me with the ability to analyze, plan and develop a strategic approach to developing and implementing an effective EA. The program was instrumental in providing techniques to identify and solving common EA challenges that exist while developing an EA."

Bobby Jones  
Chief Enterprise Architect, DHS-FEMA

"Thanks again for the (DoDAF) training. It was outstanding. I only wish I could have taken it two years ago. Your faculty and staff are great. This training is the single best professional education I've experienced."

KY LMCO

"For both FEAF and DoDAF I'd like to thank the FEAC Institute for offering the Federal Enterprise Architecture (FEA) certification program. This course is invaluable for anyone in government or private industry to gain the credentials, required understanding, and initial (or reinforced) experience in Enterprise Architecture. This program effectively combines theoretic foundational principals, practical case studies from FEA implementers, interactive discussions, assignments and hands-on project work in order to promote disciplined FEA thinking and problem solving in challenging organizational environments."

CW Oracle Corp

## About The FEAC Institute

The FEAC Institute provides the most highly recognized Enterprise Architecture certification. Our faculty and instructors are experienced, professionals that come from government, educational institutions and systems integrators that support the government. The FEAC Institute is headquartered in Washington, D.C. The FEAC Institute stresses the key to planning successful Enterprise Architecture projects is knowing the organizational culture, budgeting and developing a realistic SOW (selling it internally), monitoring and performing the work within budget and scope. Participants engage in real EA projects and present that work to a practitioner faculty panel as part of the certification process.

Certified students become Fellows of the Institute and participate in a number of invited seminars and other FEAC Institute sponsored events.

Join the FEAC Institute Alumni who are leaders in the field of DoDAF and FEAF Enterprise Architecture by signing up for classes today:

The next FEAC DoDAF program start dates are:

**September 15, 2008**

**January 12, 2009**

**April 6, 2009**

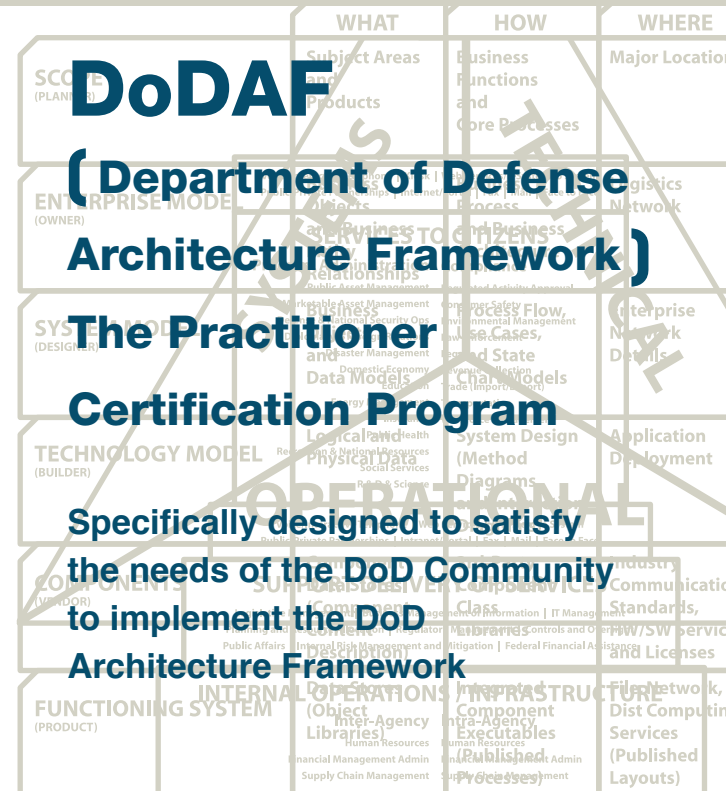

**September 14, 2009**

For additional information or to register for the FEAC program, please contact the FEAC Institute at (703) 836-1002 or visit our web site at:

### Benefits of Certification

- Learn how to model net-centric /GIG views of your operation
- Identify collaborative opportunities using the DoDAF
- Obtain results-oriented outcomes using the DoDAF
- Develop object-oriented DoDAF Integrated Architectures
- Model for Capabilities-Based DoDAF Architectures
- Relate the CADM, CPIC, JCIDS, DISR, and Portfolio Management to DoDAF projects
- CEU credits are included and university credits are available

### Who should take FEAC Certification

The DoD Federal Enterprise Architecture Certification (FEAC) Program is oriented towards **managers and practitioners** who will develop, analyze and review architecture products developed in compliance with the DoD architecture framework.

### Training Components

Series of mixed mode in-class sessions and workshops demonstrating theoretical, practical and best practice concepts of current enterprise architecture efforts. In addition our virtual component is 50% of the time spent learning. Participants develop relevant architecture products for their current work environment. You will receive expert mentoring by certified and experienced enterprise architects in class and on Virtual University. Certification Examination and Oral Briefings are the culmination of your efforts. The complete program takes 3 months to complete. Majority of interaction, mentoring and testing is done via virtual classroom

### Advantages of Registering in Teams

- Discount for groups of 5 or more from the same agency/organization (More information is available at [http://www.feac institute.org/za/FEA?PAGE=DODAF\\_COSTS](http://www.feac institute.org/za/FEA?PAGE=DODAF_COSTS))
- Develop a cadre of certified EA leaders to benefit your organization in reducing costs, risks and meet deadlines
- Leverage your organization's capabilities by training a multi-disciplined team consisting of IT, Program Managers, Security and Financial professionals, to optimize your organization's mission
- Participants will work on their organization's EA programs components for immediate applications

### Masters/PhD Program Graduate Credits

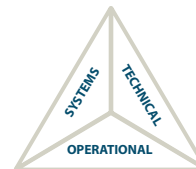

- Up to 16 Hours (4 Courses) of the Certification Program can be applied towards advanced degrees. An additional fee will be required due to the University Cost difference from the CEUs.
- Many students have already used those graduate credits towards Masters and PhD Programs at Syracuse University, George Mason, National University, SMU and others.

### Benefits for Contractor Training

- DoD requires Enterprise Architectural plans for their departments to lower risk of failure, avoidance of cost overruns and successful quick starts
- Qualified cadre of Chief Architects can lead complex EA Projects

### Short Courses available on demand

- Junior Architects: 3 Day Course
- Intermediate Architects: 5 Day Course
- Executive Presentation: 4 hours  
Customization for all courses possible
