

Comments from Our Graduates:

"The FEAC program is excellent. It will turn even the worst skeptics into believers. When the training was over I wanted to preach the message of EA to everyone. This training is a must for IT professionals."

Laura Edens
Technical Director, Oracle Corporation

"I just wanted to drop you a note on how pleased I was with the class. I really feel like the class was very challenging and provided new information relevant to current issues in Enterprise Architecture. I really feel very prepared to be successful in implementing EA at my agency. Thanks for everything."

Diane A. Reeves

"As a direct result of the comprehensive EA Certification training our USDA RMA team received at the FEAC Institute in Fall '05, we are implementing our EA plan, processes, procedures, performing assessments, and working towards OMB assessment compliance and reporting requirements. The faculty at FEAC Institute are national leaders in EA and provided academic foundations, lessons learned, and valuable practical applications. Our RMA team continues to benefit from the technical support that extends beyond the certification practicum – Two thumbs Up!!"

Mike Martinez, CEA, PMP

"The fact that I've been certified through the FEAC course has made a difference to me and to my employer. You said that we're "trailblazers, and we are indeed leading the way toward EA in the Federal arena. I'm finding that qualified and senior consultants (who are experienced with business processes, system architecture, and other component parts of EA) are hungry to learn how to fit the parts together and how to sell the program to the business managers. I really appreciate the work you and the other FEAC Institute members have put into making this a useful course."

Pat Taylor

"The FEAC Institute program delivers a complete understanding of the interrelated FEA(F), FEA, and CPIC policies and models, and it provides its graduates with an ongoing conduit to leading practices and developments in the field."

Mark Youman
Senior Principal, AMS

"For both FEAF and DoDAF I'd like to thank the FEAC Institute for offering the Federal Enterprise Architecture (FEA) certification program. This course is invaluable for anyone in government or private industry to gain the credentials, required understanding, and initial (or reinforced) experience in Enterprise Architecture. This program effectively combines theoretic foundational principals, practical case studies from FEA implementers, interactive discussions, assignments and hands-on project work in order to promote disciplined FEA thinking and problem solving in challenging organizational environments."

CW Oracle Corp

About The FEAC Institute

The FEAC Institute provides the most highly recognized Enterprise Architecture certification. Our faculty and instructors are experienced, professionals that come from government, educational institutions and systems integrators that support the government. The FEAC Institute is headquartered in Washington, D.C. The FEAC Institute stresses the key to planning successful Enterprise Architecture projects is knowing the organizational culture, budgeting and developing a realistic SOW (selling it internally), monitoring and performing the work within budget and scope. Participants engage in real EA projects within Government agencies, Support Contractors and Private Sector Companies and present that work to a practitioner faculty panel as part of the certification process.

Certified students become Fellows of the Institute and participate in a number of invited seminars and other FEAC Institute sponsored events.

Join the FEAC Institute Alumni who are leaders in the field of DoDAF and FEA(F) Enterprise Architecture by signing up for classes today:

The next FEAC FEA(F) program start dates are:

September 8, 2008

January 5, 2009

March 30, 2009

August 31, 2009

For additional information or to register for the FEAC program, please contact the FEAC Institute at (703) 836-1002 or visit our web site at:

Benefits of Certification

- GAO and OMB recommend having EA Certified employees
- Certified Enterprise Architects give you a better score AND PEACE OF MIND
- Avoid costly mistakes in outsourcing
- Influence investment decisions in your organization
- Craft practical EA solutions with direct application to your organization's needs
- Develop an EA blueprint that relates to Exhibits 300 & 53
- CEU credits are included and university credits are available

Who should take FEAC Certification

The Federal Enterprise Architecture Framework Program is oriented towards CIOs, Chief Architects, Architects, IRM Staff, Project Managers and Project Teams that analyze, review and develop architecture products for their organizations

Training Components

Series of mixed mode in-class sessions and workshops demonstrating theoretical, practical and best practice concepts of current enterprise architecture efforts. In addition our virtual component is 50% of the time spent learning. Participants develop relevant architecture products for their current work environment. You will receive expert mentoring by certified and experienced enterprise architects in class and on Virtual University. Certification Examination and Oral Briefings are the culmination of your efforts. The complete program takes 3 months to complete. Majority of interaction, mentoring and testing is done via virtual classroom.

Practicum Includes the Opportunity to Build Part of an EA for Your Organization:

- A strategic Enterprise Architecture
- A Security Architecture
- A combination of Business, Data, Application, and Technology architectures
- The correct way to address the FEA Reference Models Marketing and Sales of the EA in our organization's culture
- Clarity of purpose and decision making at the highest levels

Advantages for Registering in Teams

- Discount for groups of 5 or more from the same agency/organization (see our website)
- Develop a cadre of certified EA leaders to benefit your organization in reducing costs, risks and meet deadlines
- Leverage your organization's capabilities by training a multi-disciplined team consisting of IT, Program Managers, Security and Financial professionals, to optimize your organization's mission
- Participants will work on their organization's EA programs components for immediate applications

Short Courses available on demand

- Junior Architects: 3 Day Course
- Intermediate Architects: 5 Day Course
- Executive Presentation: 4 hours Customization for all courses possible
